

UTILIS USA, LLC

The purpose of this white paper is to provide facts about Utilis USA and the TM series of shelters.

Utilis USA Shelter Information:

- The Utilis USA shelter system is a rapidly deployable soft shelter that incorporates a unique external folding-frame design and an internal liner system integrated with the outer fabric.
- The shelter system sets up in 3-5 minutes with minimal people. For example, the TM54 (600 ft²) can be erected in under 5 minutes and only requires 4 people.
- The internal liner has integrated electrical outlets and air conditioning plenum pre-installed.
- The removable floor is made from a heavy weight material to stand up to harsh conditions in the field and remains integral to external fabric via a novel sandwiched Velcro design to reduce set-up time.
- The internal liner stays integral to the external fabric of the shelter to greatly reduce the shelter set-up and "under canopy" time.
- The shelter is packaged into 3 carry bags that make it easy to transport and very manportable.
- All of the Utilis USA shelter systems have the capability to complex to one another and to other shelters currently in the military inventory.

Military Testing:

- U.S. Army Force Provider and U.S. Air Force BEAR Base have each conducted independent evaluations and gave the shelters very high marks.
- The U.S. Army paid for the complete series of standard military shelter testing at Aberdeen Test Center.
 - Utilis USA has successfully passed:
 - 55 mph wind sustained for 30 minutes with three 10 second bursts of 65 mph
 - Two inches per hour of wind driven rain sustained for 30 minutes
 - 50 erect/strike cycles
 - 10 lbs per sq ft of snow load sustained for 12 hours
 - 100-meter naked eye, 300-meter night vision goggle and ingress/egress blackout
 - Utilis USA passed every test at Aberdeen Test Center on its first attempt without any additional kits!

Company Background:

- Utilis USA, LLC is located in Fort Walton Beach, FL near Eglin Air Force Base.
- Small Business Administration awarded Utilis USA, LLC a HUBZone certification in 2007.
- Our product line includes rapidly deployable tactical soft-wall shelters that incorporate a patented state-of-the-art folding-frame design and has been field-proven in Europe for the last seven years.
- The Utilis design was introduced to the U.S. Army in 2005, began manufacturing in the U.S. in 2006, and is fully Berry Amendment and Buy American Act compliant.
- Utilis USA shelters are gaining recognition due to their simple but durable design and lightweight features.

Utilis USA Shelter Warranty Information:

- Utilis USA offers a 3 year warranty from the purchase date.
- Utilis USA will repair or replace any shelter components that fail due to faulty materials or workmanship.

Our Support and Service Agreement:

- After purchase of a Utilis USA shelter you can expect customer service that is unparalleled to any other shelter company.
- New purchases receive operational training, troop rotational training, repair/maintenance training (not normally needed), and telephone support.
